TATA MOTORS LIMITED

Sustainability & ESG Performance Report 2024

Annual Sustainability & Statutory BRSR Disclosure — FY 2023-24

1. Executive Sustainability Statement & Targets

Tata Motors Limited is committed to achieving net-zero greenhouse gas emissions by 2045 for our commercial vehicle business. In FY 2023-24, we reduced our direct Scope 1 emissions by 18.2% from 420,000 tCO2e to 343,560 tCO2e. Renewable electricity sourcing reached 40.5% across all manufacturing operations in India and the UK. Total water recycled and reused amounted to 3,420 megaliters, accounting for 32% of total operational water withdrawal.

2. Greenhouse Gas & Operational Energy Accounting Table

Emissions Metric	FY 2021-22	FY 2022-23	FY 2023-24
Scope 1 (Direct GHG) [tCO2e]	440,000	420,000	343,560
Scope 2 (Indirect Grid) [tCO2e]	310,000	295,000	280,000
Total Operational Scope 1+2 [tCO2e]	750,000	715,000	623,560
Renewable Energy Mix (%)	24.0%	31.5%	40.5%

**Note: Scope 2 figures are calculated using market-based emission factors. Scope 3 excludes category 11 use of sold products.*
†Restated: Baseline year adjusted to FY21 due to manufacturing consolidation.
